

Les Grandes Classiques de Longines

Capturing the soul and the style of Longines' earliest design tradition, La Grande Classique de Longines watches have until today largely retained their original appearance and proportions. Changing expectations and technical advances have now prompted Longines to update their design, not least by introducing a larger case size and offering an even broader choice of subtly refined dial faces. But the slim, sleek La Grande Classique de Longines case profile remains unchanged, as does the cool elegance that gives this collection an appeal as enduring as the classic tradition itself.

L4.288.0.11.2
