

Deployment buckle

Above: Bracelet with triple safety clasp.

Below: Push-piece opening mechanism and stainless steel bracelet with double safety diving folding clasp and diving extension.

Fixing clip

We have devised a plastic fixing clip to avoid damaging bracelets or straps when watches are packaged in a watch box, displayed in a presentation case or on another kind of support. To use the clip, place the notch of the clip on the catch of the folding bracelet clasp or the tongue of the buckle (1). Then place the pin of the clip in one of the holes in the longer section of the bracelet or strap (2) to fix the watch on the support (3).
